

Agroaires
BANANAS

• ABOUT US

The business group Agroaires Bananas S.A. began its career within the banana sector in 1993 with an extension of 19.5 hectares, producing 1,080 weekly boxes of premium bananas that were sold to local companies for export. Since then, we have focused on consolidating ourselves as leaders in the market, which is why we currently have 300 hectares of banana plantations certified 100% with Global Gap and 50% with Rainforest Alliance, with a production of 12,500 boxes per week.

As a company we seek to create a pleasant work environment for each of our collaborators, we have technical personnel committed to productivity and properly equipped work areas for the process of planting, harvesting and packing bananas. Our main objective is to take care of the quality of our product, controlling each key point of our supply chain to meet the needs of our customers.
